Problem

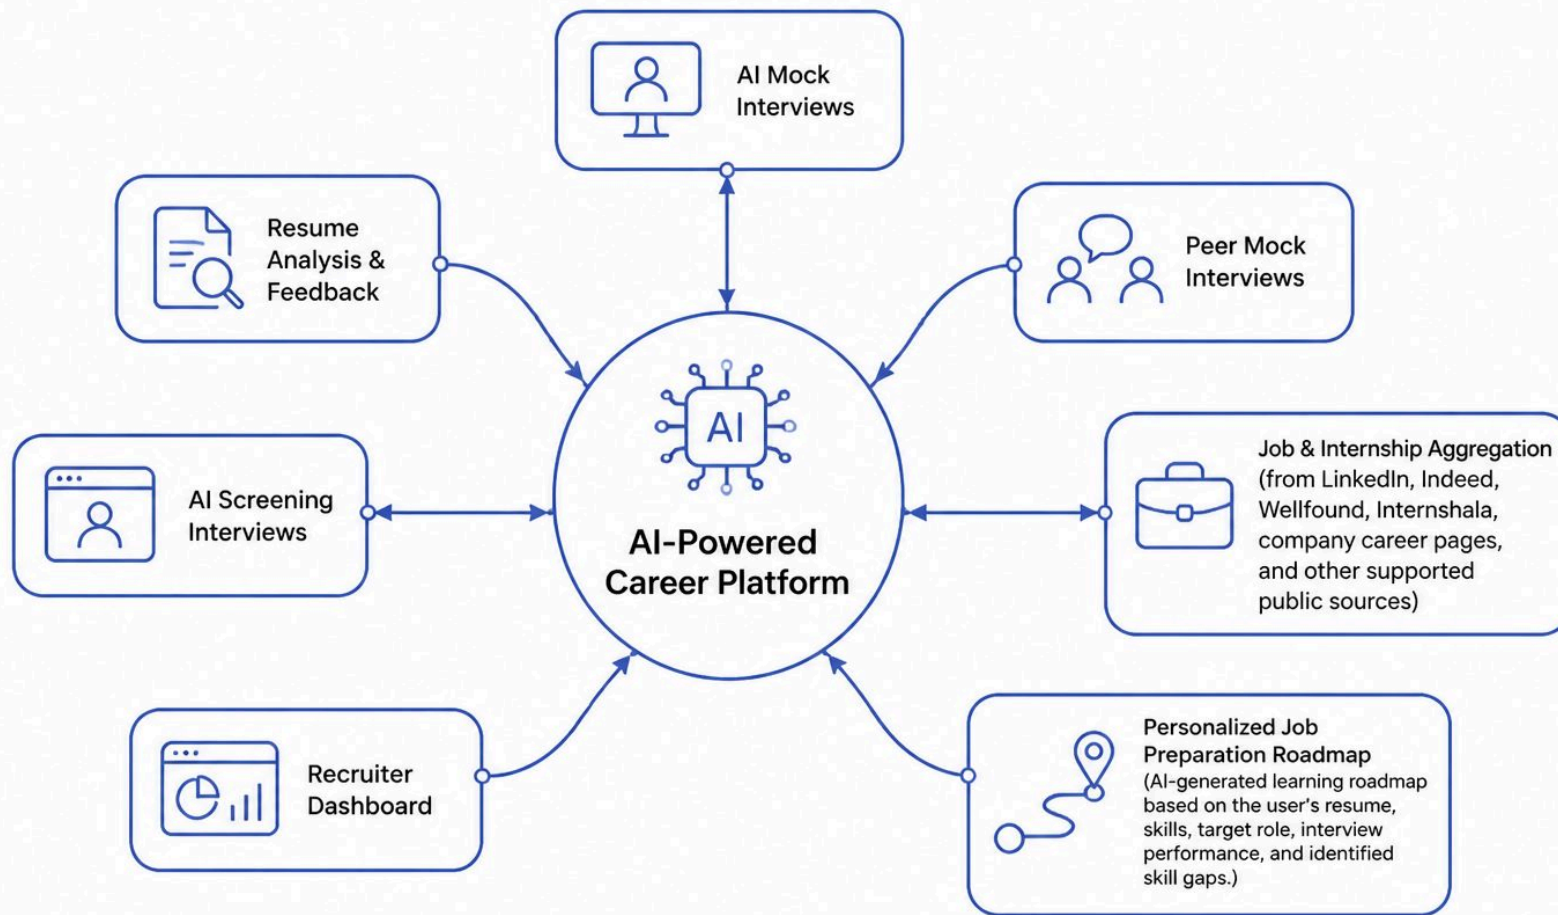

Candidates

- Interview anxiety
- Limited practice
- Lack of guidance
- Jobs spread across platforms

Companies

- Manual screening
- Slow hiring
- High recruitment cost
- Difficult shortlisting

Solution

Key Features

Realtime AI Voice Interview

Resume Analysis and Feedback

Peer Practice

Smart Job Search

Anti-cheating system

Personalized Job Preparation Roadmap

Public job and internship listings are aggregated from platforms such as LinkedIn, Internshala, other supported public sources.

AI Agents Architecture

AI Interview Agent

Simulates interactive technical and behavioral interviews

Resume Analysis & Feedback Agent

Evaluates user resumes, extracts skills, and provides structural feedback

Roadmap Generation Agent

Builds custom, step-by-step learning paths based on skill gaps

Job Aggregation & Matching Agent

Crawls and matches external job and internship listings to user profiles

Candidate Scoring Agent

Analyzes performance data to generate objective scoring metrics for employers

Peer Matching Agent

Connects users of similar skill levels for practice sessions

Anti-Cheating & Verification

Behavioral Anomaly Detection

- Real-time monitoring of candidate behavior during interviews
- Flags suspicious patterns (unusual eye movement, multiple voices, screen switching)

Enhanced Verification

- Device monitoring
- Proctoring capabilities for high-stakes screening rounds

Monetization

Freemium for Candidates

- Basic short time mock interviews for free
- Premium roadmaps and advanced practice behind subscription

SaaS/Per Interview Pay as you go Subscription for Recruiters

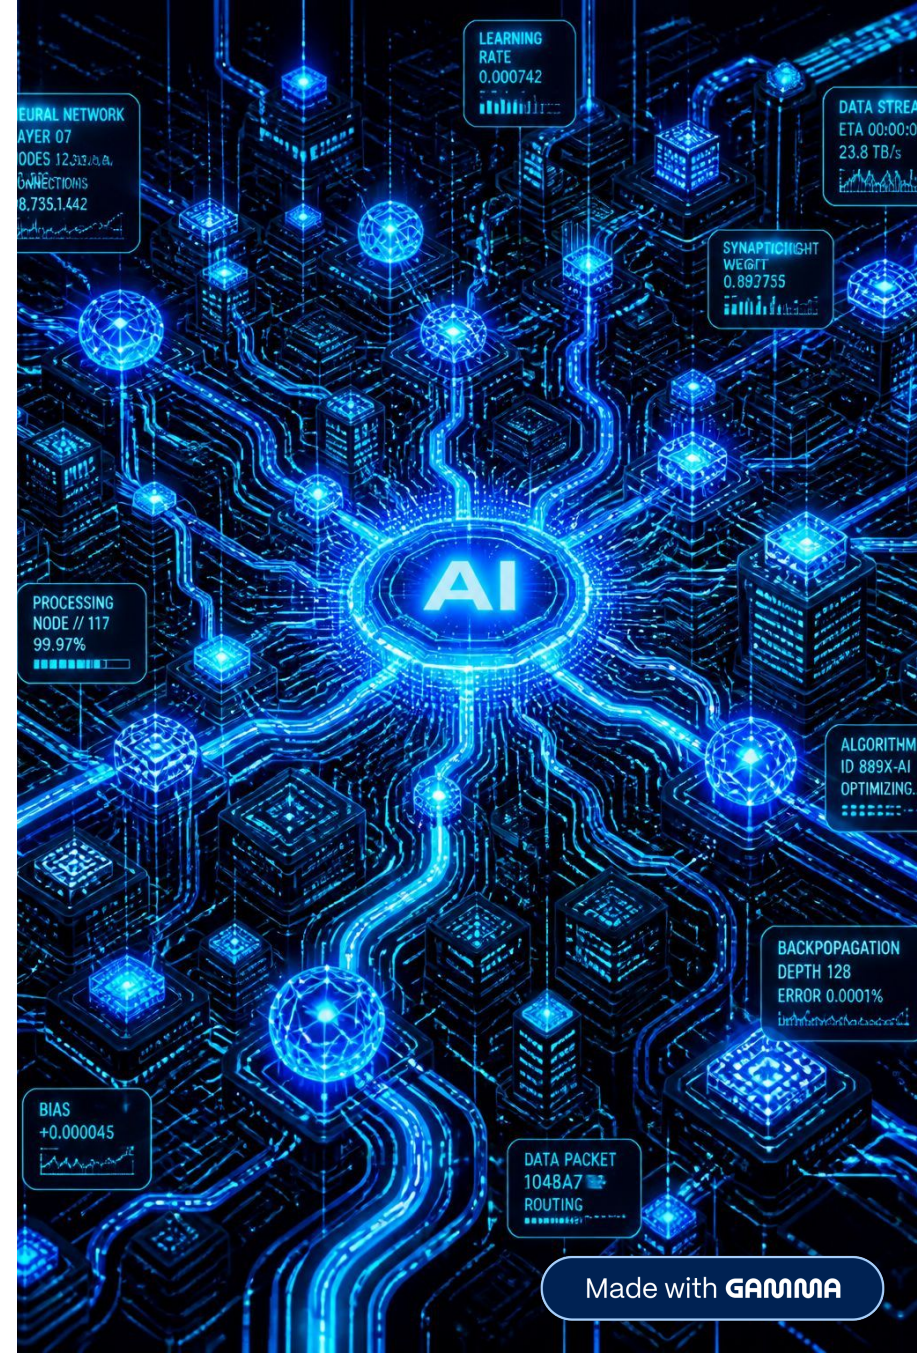

- High-volume screening and candidate evaluation
- Recruiter dashboard and AI-powered shortlisting

Conclusion

AI-powered hiring

Scalable & efficient

Bridges candidates & recruiters

An illustration of two people sitting at a table, facing each other. The person on the left is gesturing with their hand. On the table are a bowl, a cup, and some papers. The background is a light blue and white network of lines and dots. There are three speech bubbles: one large one in the center with a cursor pointing to it, and two smaller ones on the right. A question mark is also visible in the background.

Thank You
